

PROLIFICS INDUSTRY SOLUTIONS :
LEGAL INFORMATION SYSTEM ACCELERATOR
FOR LEGAL DEPARTMENTS

Prolifics delivers a Legal Information System. This accelerator is a custom portal solution that provides attorneys and support staff in legal departments and law firms with a Web-based business tool that can allow instant access to both external legal resources, such as LexisNexis® and Westlaw®, in addition to internal information on cross-departmental projects and contracts. The portal provides the ability to find and collaborate with other attorneys online, look up all the documents related to a particular client, and manage status and workflow of ongoing projects.

A Unified View into your Department. The Legal Information System Accelerator is an encompassing solution that brings together all of your day-to-day applications through a unified interface. When you log into the system, the view is personalized and customized according to your role and is designed for maximum ease of access to only the materials that are relevant to

you. You can use the People Directory to look up information about attorneys and immediately consult with them if they are online; you can instantly view your email and calendar; and you can work with documents and task lists, making them available to the rest of your team. The portal will consolidate all project and contract information from different repositories, and will relate them appropriately to respective client information.

Productivity is Power. With cohesive access to the critical information you need, you are able to get your job done more efficiently. The Legal Information System Accelerator will provide access to external research sites, as well as internal repositories that store project histories, research information and other reference materials. The portal also provides collaboration capabilities that enable you to assign tasks and share documents with your team members within an electronic workplace.

Automating your Workflow. The Legal Information System can automate your workflow enabling you to work more efficiently with a team and to manage important dates. You will be able to send a draft document to another team member for review, receive automatic notification when their review is complete, and view previous document changes. By automating your workflow you can manage critical deadlines more effectively. For example you can see at a glance when a critical brief is due or whether a court appearance is imminent.

Designed for Attorneys. Prolifics worked with IBM's Legal team, which brought its wealth of knowledge concerning the IT needs of a legal department to the design of the system. In combination, Prolifics, having serviced two of the top law firms in New York, *Weil, Gotshal & Manges LLP* and *Cravath, Swaine & Moore LLP*, leverages its technical expertise to craft a robust solution that will empower your department.

The Legal Information System Accelerator Designed for Attorneys

Benefits include:

- ✓ Reduces email dependency and volume
- ✓ Increases accuracy and ability to self service
- ✓ Reduces time to onboard new attorneys
- ✓ Extracts greater value from legal knowledge base
- ✓ Significantly reduces annual costs within your legal department
- ✓ Increases attorney job satisfaction
- ✓ Streamlines legal processes
- ✓ Improve the quality of client and corporate service
- ✓ Increases business flexibility

LEGAL INFORMATION SYSTEM ACCELERATOR

FEATURES AND BENEFITS

Custom Solution:

The Legal Information System Accelerator is a custom solution that incorporates best-of-breed portal technology from IBM and expert consulting services from Prolifics. The solution will be tailored to meet your organization's business and technical requirements. The following is a list of features available for your legal portal implementation:

- ◆ Best Practices from one of the largest corporate legal departments
- ◆ Customized View – Consolidated view into the department that is personalized and customized according to your role or job function, with a single login into your many day-to-day applications.
- ◆ Research – Connect to data repositories and popular legal directories, both internal and external, in order to provide research information requested by the user.
- ◆ Projects & Documents – Documents are organized into a well defined taxonomy and tagged with a rich set of metadata allowing them to be searched intuitively.
- ◆ People Directory – Locate an internal or external attorney with the expertise you need, review their blog and wiki entries or begin collaborating online.
- ◆ Calendar and Email Integration – Access to email and personal and departmental calendars in the context of the rest of your work.
- ◆ Team Collaboration – Work on cross-departmental projects, cases and matters as a team with the ability to assign tasks, monitor progress and share responsibility for documents. Share thoughts and insights using secure and controlled social networking tools.
- ◆ FAQs and RFIs – Capture answers to important questions and encourage employees to tap into the knowledge of the department.
- ◆ Workflow – Automated content and document approval process and the ability to participate in business processes between other departments and teams.
- ◆ Business Intelligence Reporting – Secure and personalized access to department data and performance metrics, allowing employees to better understand their performance and how it affects the organization.

About Prolifics

Founded in 1978, Prolifics is the largest systems integrator specializing in IBM technologies and is the 2010 Winner of IBM's Best End-user Portal Solution and Best Industry Portal Solution Awards, 2010 Winner of IBM's Outstanding BPM Solution, 2008 Winner of IBM's Outstanding SOA Solution Award and two-time Winner of the Overall Technical Excellence Award. Prolifics specializes in delivering end-to-end SOA solutions, content and collaborative portals, business intelligence dashboards, data cleansing strategies and security models. A Premier Level IBM Business Partner, Prolifics brings highly specialized skills to all aspects of the full project lifecycle including architectural advisement, design, development through deployment, administration and training. In 2008, Prolifics joined with SemanticSpace Technologies and Arsin Corporation to form SemanticSpace Group - expanding its global presence and offerings. Prolifics has serviced more than 3,000 customers worldwide across a broad range of industries. For more information, visit www.prolifics.com.

The Legal Information System Accelerator was awarded the Best Industry Solution Award from IBM in 2010.
