Agile Integration Workshop

Our Agile Integration Workshop pairs you with our integration architects to help you understand and discover modern integration architectures and how they can align to your business objectives. During the workshop, we work with you to understand your current integration landscape, business drivers and pain points; identify areas of improvement and introduce a plan for next steps.

Workshop Goals

- Understand strategic objectives and business outcomes, and how they align to the right integration strategy
- Understand AS-IS integration landscape to identify areas of improvement
- Create high-level blueprint for a TO-BE architecture
- Create roadmap for Agile Integration

Take Away ...

- Executive summary of workshop findings including business drivers, pain points and key business outcomes
- Assessment of AS-IS integration landscape including areas of improvement; an implementation roadmap to get to TO-BE architecture

Who Should Participate

- Integration Lead/Architect
- IT Owner/Manager
- Infrastructure Architects
- Application Architects
- Data Architects
- Cloud Architects
- DevOps Architects

Prolifics Strategic Workshops empower you to achieve a successful digital transformation and accelerate your business. Our experts peel back the layers to understand your challenges and objectives and create a roadmap to drive your business outcomes.

Engage with us across the entire spectrum, or at any point in this journey.
