

DATA GOVERNANCE WORKSHOP

Data Governance is key to building a successful data practice, ensuring trust from every source of information that runs through your business.

As legislation evolves and improved practices around privacy, such as GDPR and CCPA, work to empower clients, organisations need to ensure a bullet-proof governance architecture.

Prolifics provide you with a proven roadmap to compliance, alongside a framework to tangible business value.

WHAT DO WE DO?

Prolifics work closely with your team to evaluate and create a true transformation framework, which provides a cultural alongside a digital transformation.

Our team work across your organisation to bridge the gap between data culture and your business goals with a five step plan, encompassing vision, process through to technology.

Software is only the first step- we evaluate your current estate and enhance, rather than 'rip and replace' which result in increased costs.

HOW DOES THIS HELP?

A trusted, data governance architecture can stimulate vast innovations internally and externally, while meeting crucial business objectives. For example:

Data Accountability

- Document data standards across the enterprise.
- Roles & Responsibilities (RACI) for data management.
- Responsible data stewardship via staff training.

Data Quality

- Define key data items with measures & KPIs.
- Establish data quality checks as BAU activities.
- Data rules across processes are accurate.

Data Culture

- Improved knowledge with Customer 360.
- Business Intelligence across the enterprise.
- Streamlined reporting w/ accurate data.

TRANSFORMATION FRAMEWORK

VISION

"Data-First" Vision, driven by Principles, Values, Respect & Trust.

PEOPLE

Focused on the vision, their Roles & Responsibilities w/ Proper Organizational Structure & Support.

PROCESS

Enterprise Processes, Principles, Capabilities & Standards.

DATA

High-Quality Enterprise Data Assets, Monitoring, Privacy & Protection.

TECHNOLOGY

Integrated solutions, enabled by the enterprise.
