Workshop Series

Identity Management Workshop

Collaborative, 1-day, FREE

Identity and access management is a critical component of your cybersecurity strategy. Our cybersecurity experts will guide you through a high-level review of your current user or resource identity repository and apply best practices to strengthen your security posture.

✔ Workshop Goals

- Understand current business strategy, cyber posture and identity administration
- Review current cybersecurity, technology architecture and identity management process
- Prioritize business use cases
- Identify gaps, opportunities and solutions; lay out next steps

✔ Take Away ...

- Recommendations on future identity, resource and technology architecture
- High-level vulnerability strategy and cybersecurity guide
- Operational high-level best practices
- High-level implementation roadmap to deliver solutions that derive value fast

✔ Who Should Participate

Your Team
- Executive/Business Sponsor
- Business Leaders
- System Administrators
- Enterprise Architects
- Cybersecurity SMEs

Prolifics
