Digital Workers Workshop

Our Digital Workers Workshop pairs you with our automation experts to understand your operational landscape and identify quick automation opportunities and the associated business value that the digital worker guarantees. Workshop activities include an overview and demo of digital workers, process completion with SMEs, FIT assessment, system and application assessment and development of a smart implementation approach.

Workshop Goals

- Identify and evaluate improvement opportunities and operating environment for digital worker applicability
- Quantity guaranteed gains to realize post implementation
- Determine prepackaged digital workers vs. custom development to define scope and effort

Take Away ...

Assessment deck that includes:

- Business drivers and operational challenges
- FIT for purpose statement
- Digital workers with guaranteed outcomes
- Scope of jump start
- Success criteria replay
- Itinerary and roles of the jump start
