Build the Right Cloud Transformation Strategy

By 2020, 75% of organizations will be involved in some level of cloud transformation within their enterprises. With technology so disrupted, organizations need a structured approach for adopting and optimizing cloud services.

Getting to the cloud isn't the same as rolling out a new productivity application, installing the latest switch, or configuring virtual machines. Each cloud creation and migration effort is different, even within the same enterprise, as is the analysis, strategy, and planning involved with each initiative. Each phase of cloud migration should inform the selection of the best vendors, tools, timeline, and resources to deliver superior, reliable results.

Make a Confident Move to Cloud

The Prolifics' approach navigates a path to systematic cloud adoption. It provides a detailed methodology for your end-to-end cloud journey, with a focus on the three core elements of people, process, and technology. Using this foundation, our experts help transform your existing enterprise by leveraging the right cloud services (private, hybrid, or public cloud).

By aligning both the technical and business points of view, we establish an enterprise perspective on cloud adoption. Our expertise, combined with our accelerators, streamlines the adoption of cloud services for your enterprise.

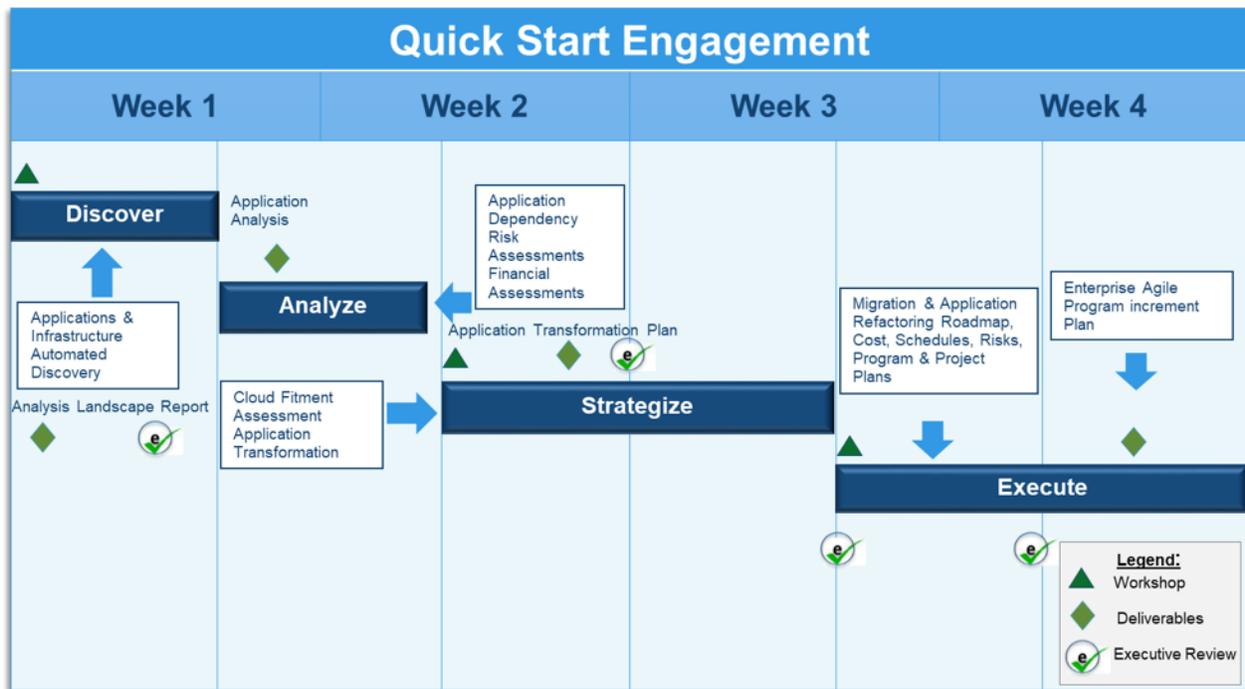

This approach helps ensure that business imperatives are not left behind in the rush to a digital future. The resulting plan is detailed and pragmatic enough to execute with confidence. Without solid planning, many transformations produce lackluster results or fail outright.

A Comprehensive Cloud Approach

The Prolifics approach navigates a path to systematic cloud adoption. Going into your cloud transformation with a comprehensive plan in place is key to success.

Prolifics helps organizations take on their transformations with the right resources and methodologies. In our targeted, customer-tailored Cloud Assessment Quick Start, we work on-site with clients to formulate a migration plan that best suits the organization's unique needs and, in the process, demonstrates the impact of each potential transformation implementation.

By aligning both the technical and business points of view, we establish an enterprise perspective on cloud adoption. Our expertise, combined with our accelerators, streamlines the adoption of cloud services for your enterprise.

The Cloud Assessment Quick Start

- ▶ **Discover** your current full environment of applications, architecture, and IT processes with a focus on developing business, goals, objectives, and strategy.
- ▶ **Analyze** your portfolio for a full view of applications, dependencies, critical business units, and the risks and financial impact associated with changes to the status quo.
- ▶ **Strategize** your application migration to understand the future-state architecture, prioritize actions in regard to the application layer, and refactor, rehost, and revise planning for applications based on business process differentiation, technology factors, or costs.
- ▶ **Execute** the creation of a migration roadmap. This takes into account leveraging the right skills and capabilities, promoting agile and seamless integration, developing a funding model, and establishing robust cloud governance and metrics.

Prolifics has successfully applied this methodology with clients around the world. The results are clear: fast, efficient, cost-effective, and successful transformations.

Some advantages of this approach include:

- ▶ Stakeholder consensus and achievable transformation goals.
- ▶ More thorough planning for greater success.
- ▶ Improved security and compliance.
- ▶ Lower costs.
- ▶ A comprehensive blueprint that enables transformation.

Prolifics' Cloud Assessment Quick Start:

- ▶ Examines all options in support of business objectives.
- ▶ Thoroughly assesses, analyzes, and weighs options.
- ▶ Produces a detailed, documented blueprint and roadmap.
