

IBM CLOUD PAK FOR DATA

LEVERAGE IBM CLOUD PAK FOR DATA TO ENHANCE YOUR DATA MANAGEMENT AND ANALYTICS

END-TO-END SOLUTIONS

MODERNIZATION

Evolve your data management with containerized services

ANALYTICS

Harvest advanced insights from trustworthy data

SECURITY

Protect vulnerable data from potential threats

DEPLOYMENT

Available on-premise, on the cloud, or in a hybrid cloud

Supporting Integration and Data Management

Enterprises are digitally transforming themselves to find success in the evolving marketplace. Microservices and containerization enable the quick delivery of cloud-native applications, and can reduce your middleware infrastructure requirements and costs. A robust cloud integration strategy powered by a solution like IBM Cloud Pak helps connect data, systems, and external services, unlocking new opportunities that need comprehensive integration to succeed.

But IBM Cloud Pak goes beyond just cloud integration: IBM Cloud Pak for Data empowers your analytics. It helps businesses build a trusted data foundation, harvest analytical insights, and protect data from threats. IBM Cloud Pak for Data draws capabilities from across IBM's analytics portfolio, presenting insights through a unified, easy-to-use interface.

Benefit from Prolifics' ICP Expertise

IBM Cloud Pak for Data represents the migration of legacy information management tasks into a new application deployment framework. IBM Cloud Pak for Data offers containerized versions of leading data management and analytics applications that can be rapidly developed and deployed on-premise, in the cloud, or in a hybrid cloud.

Prolifics helps businesses excel by embracing the benefits cloud has to offer.

We leverage IBM Cloud Pak in a modernization approach that helps evolve your data management technical environment using cloud functionality.

Prolifics' deep expertise with information management and analytics solutions and technologies, as well as with IBM Cloud Pak itself, equips us with the tools you need to succeed in an IBM Cloud Pak for Data initiative. Our experts perform comprehensive business value assessments to chart out the benefits your enterprise stands to gain from an IBM Cloud Pak for Data implementation. At the same time, we leverage IBM Cloud Pak for more than just data. While it offers revolutionary information management and analytics capabilities, it also stands to redefine end-to-end integration.

Some of our IBM Cloud Pak-powered solutions include:

- ▶ **Containerized IBM Middleware.** Deliver business value with a catalog of containerized IBM middleware and services.
- ▶ **Cloud-Native Application Development.** Develop cloud-focused applications that integrate your data and applications with cloud services securely and accessibly.
- ▶ **Cloud Integration.** Integrate your on-premise assets with the cloud to create enterprise-spanning benefits and facilitate digital transformation initiatives.

In our Quick Solution workshops, we quickly establish IBM Cloud Pak for Data's usability within your organization. Our experts work with yours to define your enterprise's key business needs, demonstrate the solution's capabilities to address those needs, identify a pilot workload, plan a pilot implementation, and define the pilot success criteria.
