

CLOUD CENTER OF EXCELLENCE

SUCCEED IN CLOUD ADOPTION WITH
A TRUSTED PARTNER AND A PROVEN STRATEGY

AGILITY

Achieve continuous innovation and speed to market

AUTOMATION

Automate manual processes, increase productivity, and reduce costs

INSIGHT

Increase visibility into your business needs and drive value for the enterprise

COST SAVINGS

Reduce technology debt and move from a CapEx to an OpEx consumption model

Accelerate Cloud Adoption with a Trusted Partner

Our efforts to retire technology debt, increase service agility, and improve the overall user experience led us to develop a standardized approach for cloud services that we leverage to streamline your journey toward cloud adoption. But while technology is a key consideration, the true challenge in cloud transformation lies in shifting organizational culture to embrace the cloud.

Prolifics' extensive experience makes us a trusted cloud advisor when it comes to the cloud journey. We help keep your workloads and data secure, maintain a high level of performance, lay the groundwork for enterprise-wide cloud-supported transformation, and drive a shift in business culture toward the cloud.

Prolifics' Cloud Center of Excellence

Prolifics implements a Cloud Center of Excellence (CoE) to help enterprises accelerate cloud adoption and facilitate success by driving standardization across the organization at a cultural level. We work to ensure the success of cloud adoption, migration, and operations in support of business goals. Our Cloud CoE leads a systematic process of planning, execution, and operations. Without it, digital transformation is impeded by organizational irresolution.

A core goal of the CoE is to achieve small-scope cloud wins anchored in an open-minded approach, then scale those wins upward to spread cloud culture across the organization, effecting enterprise-spanning change.

Upholding the Pillars of Cloud Success

Prolifics' cross-functional team of experts help develop and manage your cloud strategy, governance, and best practices to ensure cloud adoption success. The rest of the organization can then leverage these resources to transform the business and embrace a cloud-focused future.

Our Cloud CoE is centered around people, process, and technology. People are at the heart of planning, execution, and operations in the cloud. By aligning both the technical and business points of view, we establish an enterprise perspective on cloud adoption. Based on this foundation, we build a standardized approach for adopting, migrating, and managing cloud services. Our experts identify cloud-related roles, map them to organizational units and individuals, and ensure they are appropriately empowered to carry out cloud responsibilities.

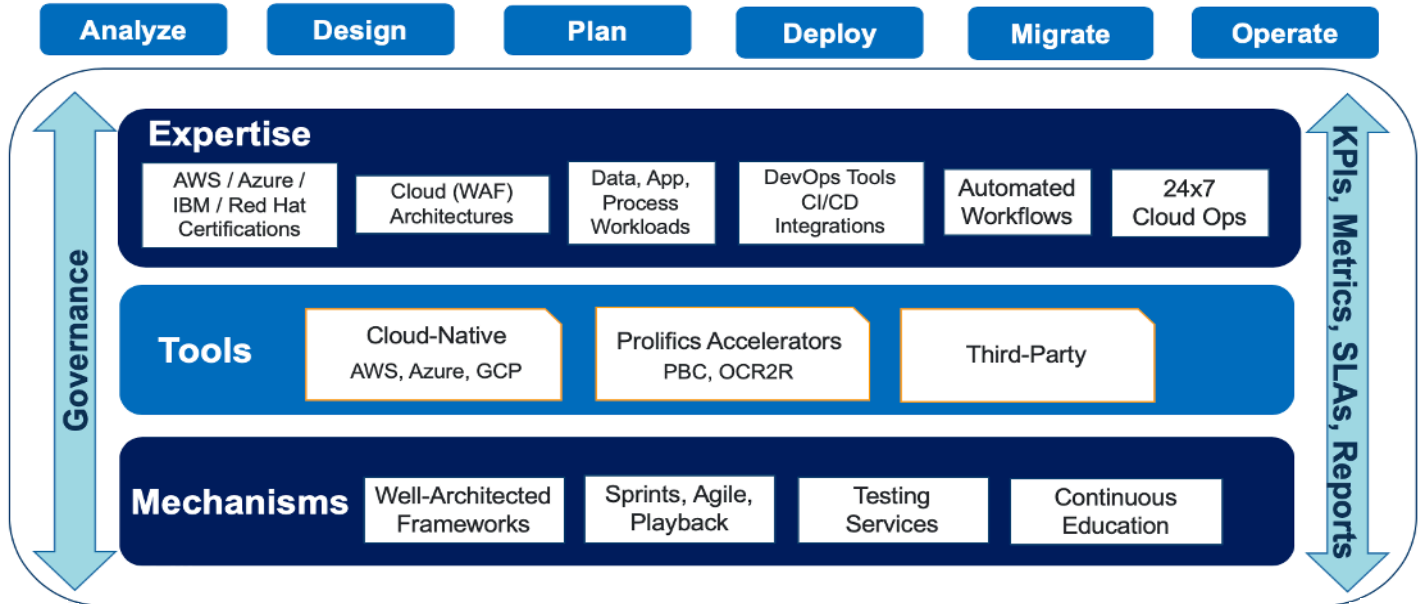

Once the key elements of a cloud approach are in place, we carry it forward with continuous education and training that help your IT resources utilize the cloud to its full potential.

The CoE works closely with the business to create a highly agile IT organization, which in turn helps the business better serve its customers. Enterprises enjoy a better understanding of cloud capabilities and responsibilities, realize the value of the cloud, and show positive ROI on cloud initiatives.

"Centers of excellence (CoEs) accelerate the uptake of new technologies and optimize core capabilities with higher efficiency and lower costs."

—Gartner

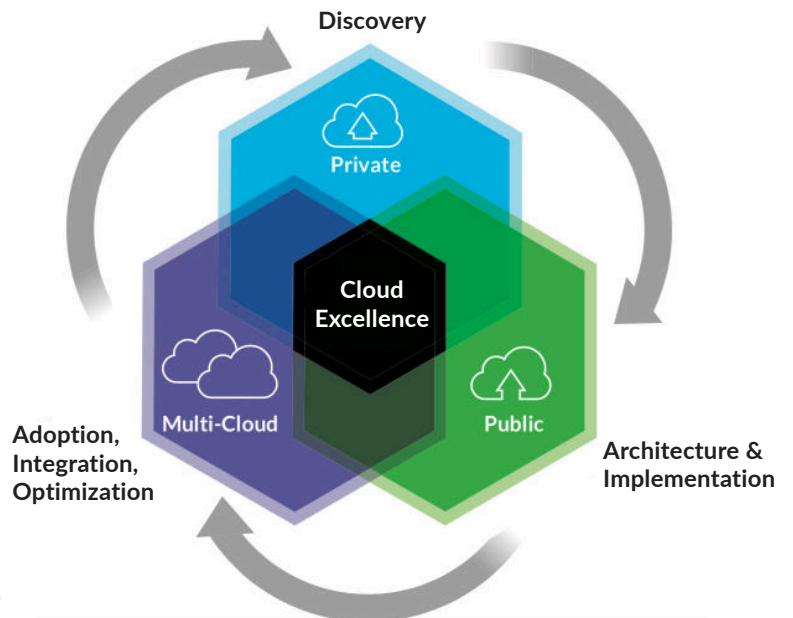

The Prolifics Cloud Center of Excellence

Steps to Cloud Success

No matter where you are on your cloud journey, Prolifics' cloud navigation strategy can help make your initiative a successful one. Our services include:

- ▶ **Defining scope.** We develop an understanding of your enterprise needs and define the benefits of cloud adoption. Our experts determine priorities, help plan the migration and adoption process, and codify how ROI will be measured.
- ▶ **Defining objectives.** We target the overall goal of your cloud adoption by defining objectives and assessing gaps.
- ▶ **Proposing methodology.** We define resources, best practices, leadership approaches, governance models, and frameworks that your organization can leverage to transform your business using the cloud.
- ▶ **CoE design.** We develop the CoE to support cloud transformation in a way that best reduces inefficiencies, empowers governance, increases agility, achieves economy of scale, and eliminates duplicated workloads and resources.
- ▶ **Roadmap development.** We chart a roadmap to transformation based on the CoE methodology. This can produce a proof of concept for moving a small resource to the cloud, proving out the value of cloud transformation.
