#### SECURITY

Protect sensitive data and meet regulatory standards

### Staying Competitive in Today's Market

We understand the growing challenges faced by our clients in the mortgage banking industry. We also understand the opportunities that exist to use the power of technology to create competitive advantage

Prolifics helps forward-thinking companies succeed in an increasingly complex and highly regulated environment. Our customized solutions empower our clients to do just that with loan origination systems that are dynamic, scalable, integrated and comprehensive.

### End-to-End Loan Origination Solutions

Prolifics provides development, modernization, maintenance and enhancement of loan origination systems encompassing various business channels.

Our mortgage IT specialists have years of experience integrating loan origination systems with market-leading systems and services, including credit, flood, automated valuation, underwriting systems, title services, appraisal services, fraud detection systems and document engines.

### Why Prolifics?

Our in-depth expertise includes:

- ▶ Designing and developing underlying frameworks and platforms to build enterprise class mortgage Loan Origination Systems
- ▶ Building and integrating centralized authorization and entitlement systems to govern access security
- ▶ Developing lead and contact management systems that reach out, identify and convert prospective borrowers
- ▶ Integrating Point-of-Sale applications with external systems and services, including: credit reporting systems, pricing engine, fee engine, document engine, credit card processing and CRM systems
- ▶ Developing and maintaining pipeline management systems to monitor the loan pipeline and generate management reports
- ▶ Designing and developing customer facing portals with information about prevailing loan programs and interest rates, loan and payment calculators and loan applications
- ▶ Designing and developing secure document posting, access, review and printing systems
- ▶ Design and develop workflow, image and document enable platforms
